Snaps

A snap fastener, also called snap button, press button, press stud, press fastener, dome fastener, popper, snap and tich (or tich button), is a pair of interlocking discs, made out of a metal or plastic, commonly used in place of traditional buttons to fasten clothing and for similar purposes.

A circular lip under one disc fits into a groove on the top of the other, holding them fast until a certain amount of force is applied.

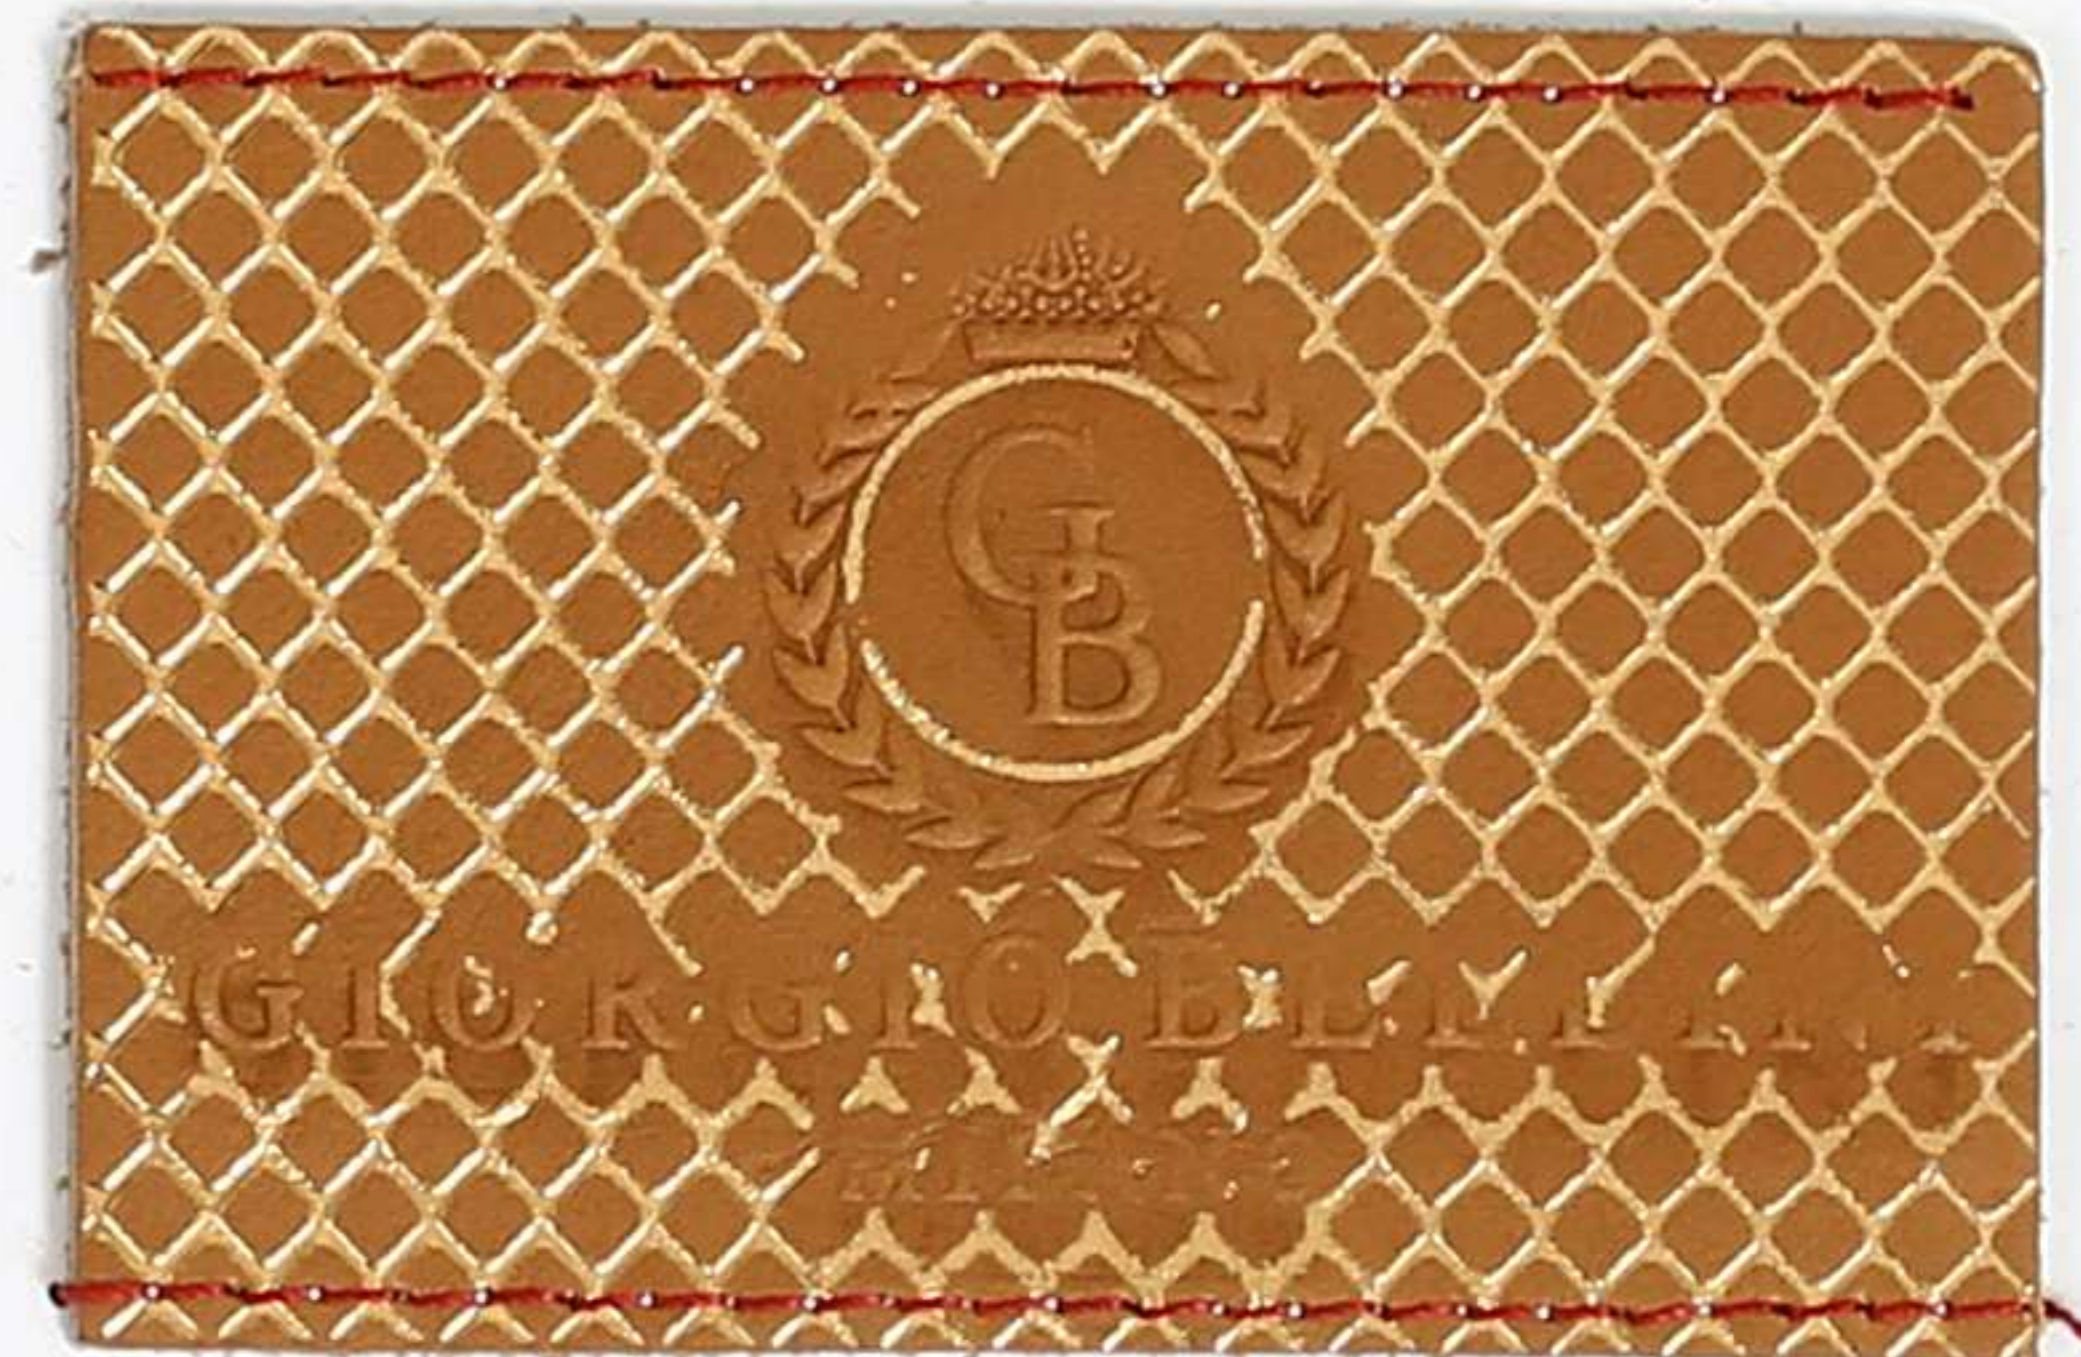

Jacron
is a soft faux-leather material,
providing a smooth and luxurious feel.
This unique material is not only visually appealing
but also durable and versatile, making it an
excellent choice for labels.

Leather

Apart from the
soft faux-leather
jacron labels,
there are also
other types available
including
faux suede, real leather,
and vegan leather
options

A Drawstring is a thread or string that passes through an opening, especially in the top of a bag or the waist of a piece of clothing, and can be pulled to fasten it or make it tighter.

An aglet or aiglet is a small sheath, often made of plastic or metal, attached at each end of a drawstring.

An aglet keeps the fibers of the lace or cord from unraveling; its firmness and narrow profile make it easier to hold and easier to feed through eyelets, lugs, or other lacing guides.

Buttons are fasteners consisting of a circular piece of solid material.

Rivets are permanent fasteners that are used to reinforce areas of a garment.

They are commonly found on jeans. Most jeans have over a half-dozen rivets, and some of them have even more rivets.
